2.10.5. Conflict-related infrastructure damage and other war impacts

Between 1 March 2025 and 17 August 2026, Insecurity Insight recorded three attacks on health care in Al Jazirah, one attributed to the RSF, one to the SAF and one to an unidentified armed actor. No destruction or damages to health facilities resulting from these attacks were recorded.[1022] Between 1 March 2025 and 31 May 2026, Insecurity Insight did not record any attacks on educational facilities in the state.[1023] The Sudan Doctors Network revealed increasing signs of recovery in the health sector in Al Jazirah state, stating in December 2025 that more than 88 hospitals had returned to service, compared to only 11 that were operating at the beginning of 2024.[1024] As of the beginning of 2026, the important agricultural sector in Al Jazirah state was still impacted by damaged irrigation systems and stolen machinery, likely contributing to below-average production.[1025]
